

Multiblist

The latest "Number One" Packaging machine

HORIZONTAL PACKAGING OF ORAL FORMS (Blister or bulk)

Laser scanner capable of reading EAN 13, EAN 39, EAN 128 and Data Matrix. Manual or integrated in the machine.

Packaging of Blisters or bulk drugs

- Horizontal packaging
- Repackaging of pre-cut blisters in big format
- Internal PC
- Bar code reader (EAN 13, 19, 128 and Data Matrix)
- Emergency stop button
- Digital thermal control
- Precise and high quality pre cutting
- Airtight sealing
- maximum Speed: 2.220 units/hour
- Low maintenance
- Direct printing on thermal paper allowing also to add logos and shapes
- Consumables: 2 rolls (thermal and color paper)

5 colors for easy identification (expirations, special drugs, etc.)

Printouts can be both horizontal and vertical. Logos and shapes can also be added.

Dosiroler

Unit Dose pool organizer

- Compatible with all unit dose packaging machines
- Can be fixed to the wall or placed on a table
- Anodized aluminium frame and PVC back and sides
- Can store 19 specialties besides the Dosiroler Compact (20 without the Dosiroler Compact)
- Roll of blisters is easily made with the Dosiroler Compact

Todoral mini2

The most difficult.....made simple.

Big pill, big gap, with clearance.

Small pill, small gap, with clearance.

More than 2 rows, slide around the bar.

Diagonals or offset, just find a row and go.

Blistercut

Electric scissors for cutting blisters

Maximum comfort and ease to cut for drug blisters

Autodrugs With three Single dispenser systems: spring (Springdose), drawer (Electrostock and Cabistore) and door (Cistercontrol and Drawercontrol)

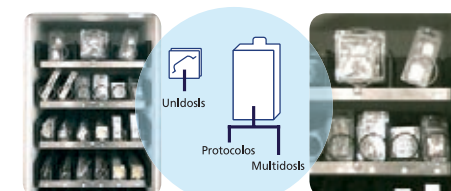

Spring-coils

Spring controlled Unit dose dispensing.

Ideal system for maximum control of certain products: narcotics, high cost drugs, etc.

- Dispensing by a closed system, no external access possible, aluminium finish
- Maximum safety when taking out the dose or multidose per patient and user, with no further access to products or doses other than those requested to the system. (authorized staff cannot withdraw without control more medication than the one entered in computer of the dispenser)
- Operated through a touch screen with password access
- Availability of several modules adapted to the needs of each nursing unit
- Comprehensive connectivity with different services and areas of the Hospital
- Meets the storage "KANBAN" System. (It dispenses the drug that most time is stored, minimizing the risk of expiry)
- Dispenses protocols individually or in the forms of packs

Spiral dispensing mechanism through coils, for unit dose or packs and quick ejection of protocols

Electrostock

Dispensing through controlled opening of large drawers

- Ideal solution to contain large number of specialties or big volume medication
- All contents at sight
- Divisible drawers with dividers holding identifiers
- Smooth closing, with no knocks
- Modular configuration

Access through authorized password. Drawer for returns.

Screen offers the description of the drug to take out from the corresponding open drawer.

Full opening of the drawer, "hands free", smooth closing, with no knocks. Each drawer is provided with dividers and identifiers

Autodrugs Mix (Springdose + Electrostock)

Ideal combination that offers an option for drugs of maximum control and another for the rest of products

Cistercontrol

Cabinets with door opening control

- Interior capacity of 400 l
- Possibility to add more cabinets with the computer of the first unit
